PRESIDENT'S MESSAGE FOR IAAF SCORING TABLES

MESSAGE DU PRÉSIDENT À PROPOS DES TABLES DE COTATION DE L'IAAF

On behalf of the IAAF, I am very pleased to introduce the latest edition of the IAAF Scoring Tables which, as usual, has been updated to take account of changes in the performance of athletes. But sadly, I must also express the sadness felt by the world athletics' family at the death, in 2010, of Dr Bojidar Spiriev, who was both the architect and the "soul" of the Scoring Tables, not only devising them but ensuring that they remained relevant and useful. Dr Spiriev will be fondly remembered not only for his genius in inventing a way to fairly measure the performances of different athletes, from so many different disciplines, but most of all for his great love and passion for athletics. For him, statistics were not simply dry facts and figures but a way to communicate the emotions and drama of sport. Thankfully, Dr Spiriev passed on this love of athletics to his son Attila and I am very happy that he will continue to honour the memory of his father by ensuring that the IAAF Scoring Tables will continue to be a vital, practical reference work for all those who work in the sport, as they have been since 1982.

The great beauty of athletics is that it has always been "many sports inside one" – but of course, this raises many challenges as well. How do you measure and compare athletes of different disciplines? – but thanks to the IAAF Scoring Tables it is possible to sit and compare, for example, a woman's best high jump performance with a man's result in the marathon. And although it is natural that people will lean towards subjectivity when evaluating athletic results, thanks to Dr Spiriev, there is an objective measure, based on mathematical principles, to ensure that "fair play" applies just as it does in the stadium, or on the roads and cross country course.

Lamine Diack **IAAF President**

Au nom de l'IAAF, j'ai grand plaisir à présenter la dernière édition des Tables de cotation de l'IAAF, réactualisées comme toujours pour tenir compte de l'évolution des performances des athlètes. Mais hélas, je dois également exprimer toute la tristesse éprouvée par la famille mondiale de l'athlétisme à l'annonce de la disparition du Dr Bojidar Spiriev. Il était à la fois l'architecte et "l'âme" des Tables de cotation qu'il a non seulement conçues, mais qu'il s'est attelé également à rendre toujours fiables et précieuses. On se souviendra avec affection du Dr Spiriev, non seulement pour son génie d'avoir inventé un moyen d'évaluer équitablement les performances d'athlètes différents dans tant de disciplines différentes, mais surtout pour son amour et sa passion immenses pour l'athlétisme. Pour lui, les statistiques ne consistaient pas en de simples faits et chiffres bruts, mais en un moyen de communiquer les émotions et le versant spectaculaire du sport. Par bonheur, Dr Spiriev a transmis son amour de l'athlétisme à son fils Attila et je suis très très heureux que ce dernier continue d'honorer la mémoire de son père en s'assurant que les Tables de cotation de l'IAAF demeurent un ouvrage de référence important et pratique pour tous ceux qui travaillent dans le sport, comme c'est le cas depuis 1982.

La grande richesse de l'athlétisme, c'est d'avoir toujours offert "plusieurs disciplines en une seule", mais bien entendu cela s'accompagne de nombreuses difficultés. Comment évaluer et comparer en effet des athlètes pratiquant des disciplines différentes ? Grâce aux Tables de cotation de l'IAAF, c'est possible. On peut ainsi mettre en parallèle la meilleure performance d'une femme au saut en hauteur et le résultat d'un homme au marathon. Et bien qu'il soit naturel que les gens tendent à une certaine subjectivité en analysant des résultats d'athlétisme, on dispose, grâce au Dr Spiriev, d'un instrument de mesure objectif basé sur des principes mathématiques, garant du "fair-play", exactement comme au stade ou sur les routes et les parcours de cross-country.

Lamine Diack **Président de l'IAAF**

AUTHORS' INTRODUCTION

The Scoring Tables of Athletics are based on exact statistical data and according to the following principles:

The scores in the tables of different events cover equivalent performances. Therefore, the tables can be used to compare results achieved in different athletic events.

Due to obvious biological differences, it is not proposed to fully compare men's and women's performances. Thus, the system contains scoring tables for men's and women's events respectively.

The tables are progressive, which means that the same improvement of results at higher levels leads to a greater increase in the scores. For example, to improve from 8.30m to 8.60m in the Long Jump is obviously more difficult than to improve from 6.30m to 6.60m. The degree of progressivity in the running (walking, hurdling) events is different than in the jumping and in the throwing events due to biomechanical reasons.

The **IAAF Scoring Tables of Athletics** can be used for multiple purposes, including:

- **To determine the Result Score of a performance for the World Rankings;**
- **To evaluate the competitions;**
- **To establish the best athlete award in a specific competition;**
- **To produce national, club, school and other rankings;**
- **To use it in championships of clubs, etc.**

To make comparisons easier, events are edited as follows:

- **Sprints, Hurdles and Relays**
- **Middle Distances**
- **Long Distances and Steeplechase**
- **Road Running**
- **Race Walking**
- **Jumping and Throwing events and Decathlon/Heptathlon**

Should a performance fall between two results on the tables the lower score shall be considered.

In view of tradition and in effort to keep things simple, the Scoring Tables include only whole number scores for expressing performances.

Hand times:

- **Sprints and Hurdles up to 200m: add 0,24 sec**
- **300m, 400m and 400m Hurdles: add 0,14 sec**

The tables are being continuously reviewed. When noted, discrepancies shall be removed and, if necessary, new events shall be added so that the Scoring Tables are always accurate and up to date.

*Dr. Bojidar Spiriev
(1932-2010)*

My father passed away in early 2010 and I had the duty of continuing his work. As I had worked with him some three decades I can say I have been pretty much involved with the permanent updating of his Scoring Tables, as well.

Yet, I must admit it was one of the most difficult tasks in my life to make this current revised edition, especially emotionally...

The 2011 edition of the IAAF Scoring Tables of Athletics contains 91 athletic events (46 for men and 45 for women).

We had analyzed the 2008 and 2009 statistical data together with my father and I made the 2010 analysis.

As certain results and scores became disproportionate, corrections of different volumes had to be made with creating new formulas in the following events:

- **Men's 100m, 200m, 300m, 400m, 2000mSC, 3000mSC, 15km, 10Miles, 20km, Half Marathon, 25km, 30km, Marathon, High Jump, Pole Vault, Shot Put, Discus Throw, Hammer Throw and Javelin Throw**
- **Women's 100m, 200m, 300m, 400m, 5000m, 15km, 10Miles, 20km, Half Marathon, 25km, 30km, Marathon, High Jump, Pole Vault, Shot Put, Discus Throw, Hammer Throw and Javelin Throw**

Finally I would like to thank András Szabó, Project Manager of All-Athletics.com, for his assistance in preparing this revised edition of Dr. Bojidar Spiriev's IAAF Scoring Tables of Athletics.

Attila Spiriev

INTRODUCTION DES AUTEURS

Les Tables de Cotation d'Athlétisme sont basées sur des données statistiques exactes, établies selon les principes suivants :

Les points attribués aux différentes épreuves dans les tables couvrent des performances équivalentes. Ces tables peuvent donc être utilisées pour comparer les résultats obtenus dans différentes épreuves d'athlétisme.

En raison de différences biologiques évidentes, il n'est pas possible de comparer totalement les performances des hommes et celles des femmes. Le système comprend donc des tables de cotation séparées pour les épreuves masculines et féminines.

Les tables sont progressives, ce qui signifie qu'une amélioration des résultats au plus haut niveau conduit à une augmentation plus importante des points. A titre d'exemple, progresser de 8,30m à 8,60m au saut en longueur masculin est évidemment plus difficile à réaliser que passer de 6,30m à 6,60m. Le degré de progressivité dans les courses diffère de celui observé dans les sauts et les lancers pour des raisons biomécaniques.

Les **Tables de Cotation d'Athlétisme de l'IAAF** peuvent être utilisées à des fins multiples :

- **Déterminer la valeur en points d'une performance pour les Classements Mondiaux ;**
- **Evaluer les compétitions ;**
- **Récompenser le meilleur athlète dans une compétition donnée ;**
- **Etablir des classements nationaux, d'écoles ou de clubs, et bien d'autres ;**
- **Une application aux championnats de clubs, etc.**

Pour faciliter les comparaisons, les épreuves sont groupées comme suit :

- **Sprints, Haies et Relais**
- **Courses de Demi-Fond**
- **Courses de Longue Distance et de Steeple**
- **Courses sur Route**
- **Epreuves de Marche**
- **Epreuves de saut, lancer et Décathlon / Heptathlon**

Si une performance se situe entre deux valeurs affichées dans les tables, la valeur inférieure devra être prise en compte.

Dans le respect de la tradition et dans un souci de simplification, les tables de cotation expriment les performances uniquement en nombres entiers.

Temps manuels :

- **Sprints et Haies jusqu'à 200m :** **ajouter 0"24**
- **300m, 400m et 400m Haies :** **ajouter 0"14**

Les tables sont constamment réexaminées. Si des écarts sont observés, ils seront gommés et, si nécessaire, de nouvelles épreuves seront ajoutées afin que les tables de cotation demeurent précises et d'actualité.

Dr Bojidar Spiriev
(1932-2010)

Mon père est décédé début 2010 et il était de mon devoir de continuer son œuvre. J'ai travaillé avec lui pendant quelque trois décennies et je peux donc dire que je me suis plutôt beaucoup investi dans la mise à jour permanente des tables de cotation.

Je dois cependant reconnaître que la mise à jour de la présente édition révisée a constitué l'une des tâches les plus difficiles de ma vie, particulièrement du point de vue émotionnel...

L'édition 2011 des tables de cotation d'athlétisme de l'IAAF comprend 91 épreuves (46 chez les hommes et 45 chez les femmes).

Nous avons analysé ensemble avec mon père les données statistiques de 2008 et de 2009 et j'ai effectué l'analyse de 2010.

Certaines performances et certaines valeurs en points étant devenues disproportionnées, il a fallu apporter des corrections à différents volumes en élaborant de nouvelles formules pour les épreuves suivantes :

- **Hommes - 100m, 200m, 300m, 400m, 2000m steeple, 3000m steeple, 15km, 10 miles, 20km, semi-marathon, 25km, 30km, marathon, hauteur, perche, poids, disque, marteau et javelot**
- **Femmes - 100m, 200m, 300m, 400m, 5000m, 15km, 10 miles, 20km, semi-marathon, 25km, 30km, marathon, hauteur, perche, poids, disque, marteau et javelot**

Pour terminer, je voudrais remercier András Szabó, directeur de projet de All-Athletics.com, qui m'a aidé à préparer cette édition révisée des Tables de Cotation d'Athlétisme de l'IAAF du Dr Bojidar Spiriev.

Attila Spiriev

Men's Sprints, Hurdles and Relays
