

IAAF LABEL ROAD RACES

REGULATIONS 2019

IAAF Labels are granted to events based on the evaluation of the previous year's edition of a road race. These regulations define the criteria that must be met in 2019 to obtain Labels for 2020.

The IAAF Labels for Road Races

The "IAAF Label Road Races" programme gathers the world's leading road races. An IAAF Label denotes high standards in event organisation, full application of the IAAF Competition Rules, complete support from authorities to the event, a commitment by the organiser to the advancement of the sport, and concrete steps in the global fight to doping. The Labels also categorise the best elite races, contributing to guide athletes, fans and media towards the world's finest competitions. For events with a mass participation component, Labels also signify superior standards in safety and runner experience.

The following categories of races can apply for a Label:

- Races over the following official distances for which World Records are recognised (see Rule 261 of the IAAF Competition Rules): 5km – 10km – Half Marathon – Marathon.
- 'Classic races' over standard or non-standard distances.

There shall be 4 Labels from 2020:

- IAAF Platinum Label
- IAAF Gold Label
- IAAF Silver Label
- IAAF Bronze Label

Elite athletes

There are significant changes to how elite athletes can obtain their Gold/Silver/Bronze Status. Also, there are differences in how an elite field fulfils the requirements in the context of a race's Label application.

An athlete's Status is determined by how he/she ranks in the event group(s) of the IAAF World Rankings relevant to the race applying for the Label. Such event groups are:

- For 5km, 10km, and for classic races shorter than 20km >>> event group "10,000m" and event group "Road Running".

- For Half Marathons, and for classic races on distances comprised between 20km (included) and 30km (included) >>> event group “Road Running” and event group “Marathon” (Gold Status in the “Road Running” event group for athletes ranked in the “Marathon” event group is limited to those ranked 1-150 in the marathon)
- For Marathons, and for classic races longer than 30km >>> event group “Marathon”.

For example, an athlete with Gold Status in “Road Running” but without a Status in “Marathon” will not count as Gold Label athlete in the context of a marathon’s Label application.

For the determination of the Gold-Silver-Bronze athletes’ pools for 2019, the IAAF World Rankings published after the first weekend of December 2018 (i.e., Tuesday, 4 December) will be used.

In the “Marathon” event group (men and women):

- Men ranked 1-200 and women ranked 1-200 >>> Gold status
- Men ranked 201-300 and women ranked 201-300 >>> Silver status
- Men ranked 301-400 and women ranked 301-400 >>> Bronze status

In the “Road Running” event group (men and women):

- Men ranked 1-100 and women ranked 1-100 >>> Gold status
- Men ranked 101-220 and women ranked 101-220 >>> Silver status
- Men ranked 221-350 and women ranked 221-350 >>> Bronze status

In the “10,000m” event group (men and women):

- Men ranked 1-50 and women ranked 1-50 >>> Gold status
- Men ranked 51-120 and women ranked 51-120 >>> Silver status
- Men ranked 121-200 and women ranked 121-200 >>> Bronze status

If two or more athletes are tied for the same position, they are all given the higher Label status (for example, if 4 athletes are placed 149th in the men’s “Marathon” ranking, that means 152 men get Gold status in the marathon).

Athletes can have Status in multiple event groups (for example they can be Gold in the “Marathon” and Silver in the “Road Running”, or Gold in all 3 event groups).

All Label races must have a minimum of 6 men + 6 women (for single-gender races, 7 athletes) from the pool of athletes who have status that corresponds to the Label applied for, in the event group relevant to the race.

The composition of the pools of Gold, Silver and Bronze Label athletes will be fixed for the whole of 2019. No new athletes will acquire Gold, Silver or Bronze status through performances recorded after 2 December 2018.

There is no longer an obligation for race organisers to have athletes with Gold/Silver/Bronze status from at least 4 or 5 different countries. For Platinum and Gold Label Races there is, however, a continental quota to be filled (see below).

Athletes not completing a race will not count towards the International Elite Field count for that race if they have entered another IAAF Label race in the 17 days preceding or following the race.

Continental quota (for Gold and Platinum Label only)

In addition to the 6+6 (or 7) athletes with Gold Status, Gold and Platinum Races must have a minimum of 4 and 8 athletes respectively (regardless the gender) selected from their continent's top 100 list (as of 4 December 2018) in the relevant event group. Note that this continental quota may have already been filled by athletes with Gold Status.

Appearance negotiations, athletes' contracts, prizes and payment terms

Race Directors may only conduct negotiations for the appearance and promotion of athletes:

- through the Athletes' Member Federation;
- directly with the Athletes (in this case, the relevant National Federation must be informed);
or
- through duly authorized Athletes' Representatives (ARs)

A complete list of authorized ARs is available from the IAAF website at www.iaaf.org/athletes/athlete-representatives.

As part of the post-race report, organisers shall provide a list of the Athletes Representatives with whom they negotiated the participation of Elite athletes together with the athletes they represent.

A contract established in good faith by both parties in compliance with the IAAF Rules governing International Competitions and any applicable laws of the host country of the event and outlining clearly the arrangements between the race organiser and the contracted athlete shall be signed and respected by both parties.

Organisers shall pay all sums due to the contracted athletes for reimbursement of expenses and appearance fees and any prize monies and bonus awards within the period of time specified within the contract which is normally 60 days after the receipt of doping control results conducted at the race. Suitable accommodation, meals and transportation shall be provided for the athletes. As a general rule all travel expenses should be paid upon the athlete's arrival at the race venue and no later than the day before the athlete's departure from the race venue.

The contract between the Athlete and the Organiser shall mention any withholding taxes in respect of appearance fees, prize monies or bonuses that may be levied by the fiscal authorities of the country hosting the race. The Organiser shall in due course supply the Athlete or their AR with the relevant document from the fiscal authorities certifying that any such charges have been duly paid.

The contract shall stipulate that any athlete who is subsequently determined to have committed a doping offence at the time of the event or is suspended from competition due to an offence committed prior to the event resulting in his/her performance at the event being invalidated, shall be liable to refund any and all sums from the race organisers relating to

his/her performance at the event. This includes any commission paid to an Athlete Representative.

Prize money offered to competitors, including bonuses for times achieved shall be equal for all competitors regardless of their nationality or gender – in other words prize money for places should be equal for men and women and for nationals of the host country and athletes of other nationalities. Races may offer specific incentive prizes to nationals of the host country to encourage national participation and development.

Application procedures

New applications shall only be accepted from races that have been contested for at least two editions (over the distance they are applying for) prior to the date of Application, i.e., Labels can be granted from the third edition of a race. New races applying for a Label must begin with Bronze the first year.

Application for Platinum Labels shall only be accepted from races that have been Gold Label for at least 3 consecutive years (2017-2019).

Races holding a Label for 2019 wishing to renew or upgrade their Label shall submit the “Renewal-Upgrade Form”.

Races holding a Bronze or a Silver Label for 2019 intending to apply for a Gold Label in 2020, are advised to contact the IAAF no later 30 days prior to 2019 race day, to allow for the appointment of an International Technical Delegate, who will attend the race and ensure that Gold Label criteria are met.

Races holding a Gold Label for 2019 wishing to apply for a Platinum Label in 2020 should contact the IAAF 60 days prior to 2019 race day, so that a complete review can be organised.

Races not holding a Label for 2019 and wishing to apply for a 2020 Bronze Label shall notify the IAAF per email no later than 30 days prior to 2019 race day. The IAAF may then appoint an International Technical Delegate at the cost of the race organiser, to assist the organisers in ensuring that the race is held in conformity with IAAF Rules, and to provide a technical evaluation. After the event, the organiser shall submit the “Application Form for new races 2020”.

The acceptance or rejection of an application is at the sole discretion of the IAAF. All disputes and protests related to IAAF Label Road Races will be considered by the IAAF.

IAAF Observers and Technical Delegates

The IAAF may nominate one Observer or International Technical Delegate (TD) to applicant or Label events. The Observer / TD will ensure compliance with IAAF Rules and the IAAF Label Road Race Regulations and may also be available to assist the race organisation if such assistance is requested by the Race Director.

The race organisation will provide all necessary passes, accreditation and assistance to give to observers and TDs access to the requested operational areas and pre-race meetings, and generally facilitate their work.

The IAAF will send to the Race Director a copy of the report completed by the IAAF Observer/TD whenever relevant.

For visits in 2019, the race organisation shall pay the following for one designated Observer or TD: economy class travel, on-site accommodation for a maximum of three nights, meals and local transport.

Technical, Safety & Runner's Experience

Races shall be organised in accordance with the IAAF Competition Rules.

Courses must hold an IAAF/AIMS international measurement certificate valid at least through race day.

Before race day

It is mandatory to organise a pre-race technical meeting with the elite athletes and their representatives, where all arrangements for the race (warm-up schedule, desired, configuration of refreshment stations, how to reach the finish line in case of drop-out; etc.) must be communicated, and the pacemakers introduced to the athletes. If the technical meeting is conducted in a language other than English, English translation should be provided.

The Referee must be present at the technical meeting.

A check of the athletes' race kits shall be organised for the eve of the competition (or, for afternoon/evening competitions, no later than the morning of the race day) to ensure compliance of the elite athletes' race kits with the IAAF Advertising Regulations. Only elite athletes with IAAF-compliant kit should start the race from the first corral. In an effort to make all athletes more recognisable, it is strongly recommended to provide personalised bibs with names the elite athletes, for them to wear on race day.

Organisers shall permit athletes to provide their own refreshments, in which case the athlete shall nominate at which stations they shall be made available to him. Refreshments provided by the athletes shall be kept under the supervision of officials designated by the Organisers from the time that the refreshments are lodged by the athletes or their representatives. Those officials shall ensure that the refreshments are not altered or tampered with in any way.

Transport to the start

Transport of all runners to the start must be efficient. For events with a mass race, transportation arrangements must factor in the field size and the proximity of accommodations to start line.

Before the start

There must be adequate means to control access to secured areas (ID accreditation or similar). Sign-posting in start areas shall be clear and sufficiently informative. There shall be adequate, safe and well-lit space for elite runners to warm up. Separate men/women changing facilities must be provided. If wheelchair or hand-bike races are held with the event, there must be toilets for disabled people. Efficient baggage drop-off service must be provided for both the elite and, if applicable, the mass race. Starting corrals (or waves) must be seeded by pace / expected finish time.

Road Closures

The whole course must be closed to vehicular traffic, with the exclusion of official vehicles, for the duration of the event until the published cut-off time. The start will be traffic free until the last runner has started and the finish will be traffic free until the last runner finishes or the cut-off time is reached.

In the case of dual carriageways, only the carriageway on which the participants will run needs to be closed to vehicular traffic. Whenever possible, for safety reasons, all carriageways should be closed to vehicular traffic. In Platinum Label races, the route shall be free of all traffic other than event vehicles.

The safety of all runners is paramount; therefore, police and/or traffic controllers must be present at all intersections.

The race

The original Course Measurer or other suitably qualified official designated by the Course Measurer with a copy of the documentation detailing the officially measured course shall ride in the lead vehicle during the competition to validate that the course run by the athletes conforms to the course measured and documented by the official Course Measurer. In the case of separate men and women races, a certified Measurer or other suitably qualified person should be in the lead vehicle for each race. All intermediate timing points shall be measured and marked by the Course Measurer and included in the course map. Mile and/or kilometre markers shall be installed, prominent and easy to see.

Each Label Race shall be started independently of races on any other distance. Exception to this rule can be made only if the buffer between the elites taking part in the Label competition and the participants of other races is ample enough to prevent disruption to the elite race. Once the race is started, it is essential that elite athletes participating in the Label race do not enter in contact with persons not participating in the same race, as this would result in a violation of Rule 144.3(a) of the IAAF Competition Rules on assistance.

There shall be a lead vehicle preceding the lead runners to direct the runners around the course and that shall also include a time clock indicating the time elapsed since the start of the race. Where it is safe to do so, in mixed races, a lead vehicle shall precede both men's and women's race leaders.

The Referee, or designated person, shall have the possibility follow the leading groups of a road race closely, on a motorbike or bicycle, if he or she so determines. The Referee can give warnings in case of rule violations and, for particularly serious cases, disqualify athletes.

In Platinum and Gold Label races, a photo-finish device shall be utilised to determine the placings in case of close finishes.

Pacing

Pacemakers are authorised and should be clearly identifiable through a distinctive uniform or similar. To better promote the image of all athletes, a pacemaker's main bib shall include his name. If a pacemaker has no distinctive uniform, it is allowed to have the word "PACE" together with his name on the bib, or on a second bib to be placed either on the chest or on the back of the athlete.

No more than three pacemakers may be engaged to run at any given pace.

Drinking/Sponging and Refreshment Stations

Drinking/Sponging and Refreshment stations adequately staffed by competent personnel shall be available on the course in accordance with Rule 240.8 of the IAAF Competition Rules.

Umpires shall be present at all refreshment stations, to ensure the treatment provided to all elite athletes is fair, and to report any violations.

Elite athletes may only take water or refreshments at the official stations provided by the race organisation.

Refreshments can be shared between competitors, including pacemakers. However any continuous support from any athlete to one or more others may be regarded as unfair assistance and warnings and/or disqualifications may be applied. In mixed-gender races, the handing of a refreshment from a male to a female athlete may result in the disqualification of the latter if a situation of unfair assistance is noticed.

Timing Data Processing and Results

Races must provide fully electronic timing by transponders to all finishers. Real time splits and final results which shall include the official time based on the “gun time” should be made available to media, spectators and on the official race website within the shortest possible time. Where available, split times shall be properly recorded and made available for statistics, records and judging purposes.

Races shall email the official results of the competition for the top 20 male and top 20 female finishers to the IAAF immediately following the completion of the competition in a PDF file containing both men and women results. As per the Note of Rule 165.24(e) of the IAAF Competition Rules with “official time” it is meant “...*the time elapsed between the firing of the starting gun (...) and the athlete reaching the finish line...*”.

Insurance

Race Organisers shall subscribe to an appropriate third-party liability insurance policy to cover the risks for which the race organisation may be held liable, including any accident which might occur to athletes and officials.

Additional criteria for Platinum Label

The following additional criteria, in event operations, safety and runner’s experience, must be met by races applying for a Platinum Label.

- The event must be accessible to athletes with a disability who are able to participate within the specific regulations of the relevant event.
- A dedicated, identifiable Event Safety Officer is required.
- In the year preceding that for which the Platinum Label is sought, the event must have had at least 15,000 finishers (10,000 if shorter than the Half Marathon) in the distance for which the application is submitted. At least 5% of finishers must come from countries/territories other than the one where the race takes place.
- Event cancellation insurance is required, enabling the organizer to refund all entry fees in circumstances of cancellation.
- The porta-toilet to runner ratio at the start must not exceed 1:62. If wheelchair or hand-bike races are held with the event, at least 1 every 40 portable toilets must be for disabled participants.

- Under normal conditions, the event must start within 1 minute of the advertised time.
- There must be no parked cars on the race route.
- There must capability to communicate real-time on-site to all the participants (“mass notification”)
- The runner density in the starting corrals and after the finish line must not exceed 0.25 per square metre.

Medical

The availability of medical services shall be commensurate with the number of participants in the race and the prevailing weather conditions. A Medical Director shall be identified, and his/her contact details transmitted to the TD should the IAAF appoint one for the race.

Race organisers should fully comply with the IAAF Competition Medical Guidelines in the organisation of the medical services provided to participants. As part of the post event report, Medical Directors will be required to share with the IAAF anonymised, aggregated data on medical encounters. Continuing medical education of Medical Directors is highly recommended, and will become mandatory from 2020 for the Medical Directors of all Label Races. The IAAF Health and Science Department will publish on www.iaaf.org/about-iaaf/health-science/next-events a list of recognised courses.

Anti-Doping

Two weeks prior to race day, organisers shall submit to the Athletics Integrity Unit by email (to the address: virginie.ocquidant@athleticsintegrity.org) their most up-to-date provisional entry lists, as well as details on the official hotel where the elite athletes are to be accommodated.

All tests shall be conducted in accordance with the IAAF Anti-Doping Regulations at the expense of the race organiser. The minimum number of samples to be collected shall be:

- Platinum Label: 12 samples for mixed races (6 men and 6 women) or 6 samples for single gender races. At least 6 samples must be tested for EPO. Additionally, there shall be systematic pre-competition blood tests in the context of the Athlete Biological Passport for all elite field athletes.
- Gold Label: 12 samples for mixed races (6 men and 6 women) or 6 samples for single gender races. At least 6 samples must be tested for EPO.
- Silver Label: 10 samples for mixed races (5 men and 5 women) or 5 samples for single gender races. At least 5 samples must be tested for EPO.
- Bronze Label: 6 samples for mixed races (3 men and 3 women) or 3 samples for single gender races. At least 3 samples must be tested for EPO.

Races applying for a Label upgrade must collect the number of samples corresponding to the level of the Label applied for. This also applies to races not holding a Label for 2019 and applying for a Bronze Label for 2020.

The doping samples shall be analysed by a WADA accredited laboratory.

Additional doping tests shall be conducted:

- Systematically when a World Record is broken or equalled;

- When requested by any athletes who has broken an Area or National Record (costs to be borne by the athlete's Area Association or National Federation respectively).

Communications

On-site Video Screen

All Platinum and Gold Label Races must provide in the finish area at least one giant video screen to allow spectators to follow the race.

Media Services

Appropriate media services shall be provided to the press and photographers which shall include the following minimum requirements:

- Individual delivery of results of top 20 men and women
- Dedicated website with at minimum start-lists and results in English. For Gold and Platinum Label Races, a fully-functional website in English is required.
- TV monitors + high-speed Internet connection

In Gold and Platinum Label races, there must be at least one post-race elite athletes' press conference, with English translation provided.

International Broadcast Requirements

Label Races must ensure the following.

- Platinum Label Races:
 - In the host country/territory: full live coverage on at least 1 country-wide TV network
 - International: full live coverage on TV or web-streaming in at least 20 countries/territories.
- Gold Label Races:
 - In the host country/territory: full live coverage (TV or web-streaming)
 - International: full coverage (either live or delayed) on TV or web-streaming in at least 10 countries/territories.
- Silver Label Races:
 - In the host country/territory: full coverage (either live or delayed) on TV or web-streaming.
- Bronze Label Races:
 - In the host country/territory: race highlights on TV or web-streaming.

For Platinum and Gold Label applications, media reports in English might be requested by the IAAF.

TV Coverage to the IAAF

Each IAAF Label Road Race shall provide the IAAF with the full race footage ("Dirty International Feed"), in the form of a web-link to a video-sharing website (YouTube, Vimeo, YouKu, etc.) or a digital file. This is for reviewing purposes only, and the IAAF will NOT redistribute, or have any rights on any of this footage.

Upon request of the IAAF, the organiser shall provide a broadcast-quality record of the competition (“Clean Feed”), allowing the IAAF to use, free of charge, up to five minutes of footage, unless existing media rights contracts prevent the organiser from doing so.

IAAF Branding and Promotion

All Label Road Race organisers are required to:

- Produce and display, at their cost, at least two IAAF boards (or banners) in the finish area within the final 100 metres and/or prominently display the IAAF Road Race Label logo on the finish gantry. Layouts are to be supplied by the IAAF. As part of the post-race report, organisers shall be required to provide photographs of the IAAF Road Race Label recognition.
- Display the relevant IAAF Road Race Label logo on the homepage of the race website.
- Include the relevant IAAF Road Race Label logo on all printed material (i.e., brochures, leaflets, official programme, start lists, results). Logo artwork is to be provided by the IAAF.

###
